MATTERS TO BE CONSIDERED:

The Chemical Safety and Hazard Investigation Board (CSB) announces that it will convene a public meeting to consider the Loy-Lange Final Investigation Report. The report details the investigation into a fatal incident that occurred on April 3, 2017, in St. Louis, Missouri. A massive steam explosion caused a pressure vessel weighing approximately 2,000 pounds to launch itself into the air. The initial explosion killed one worker and critically injured another. The vessel flew several hundred feet and landed nearby on another company's property, fatally injuring three members of the public.

CSB staff will present its final report with corresponding findings and recommendations. Staff presentations are preliminary and are intended to allow the Board to consider in a public forum the issues and factors involved in this case.

To submit public comments for the record please email us at public@csb.gov. Public comments sent in advance may be addressed at the meeting.

CONTACT PERSON FOR FURTHER INFORMATION:

Hillary Cohen, Communications Manager, at public@csb.gov or (202) 446-8094. Further information about this public meeting can be found on the CSB website at: www.csb.gov.

ADDITIONAL INFORMATION:

Background:

The CSB is an independent federal agency charged with investigating incidents and hazards that result, or may result, in the catastrophic release of extremely hazardous substances. The agency's Board Members are appointed by the President and confirmed by the Senate. CSB investigations look into all aspects of chemical accidents and hazards, including physical causes such as equipment failure as well as inadequacies in regulations, industry standards, and safety management systems.

Public Participation:

The meeting is free and open to the public. This meeting will only be available via ZOOM. Close captions (CC) will be provided.

Dated: April 15, 2022
